**ANNOUNCING A NEW OSHA DIRECTIVE FOR THE  
RESIDENTIAL CONSTRUCTION INDUSTRY**

On June 9, 2011, U.S. Department of Labor's Occupational Safety and Health Administration (OSHA) announced a three-month phase-in period to allow residential construction employers to come into compliance with the Agency's new directive to provide residential construction workers with fall protection.

The three-month phase-in period runs **June 16 - September 15, 2011**. During this time, if the employer is in full compliance with the old directive (**STD 03-00-001**), OSHA will not issue citations, but will instead issue a hazard alert letter informing the employer of the feasible methods they can use to comply with OSHA's fall protection standard or implement a written fall protection plan. If the employer's practices do not meet the requirements set in the old directive, OSHA will issue appropriate citations.

If an employer fails to implement the fall protection measures outlined in a hazard alert letter, and during a subsequent inspection of one of the employer's workplaces OSHA finds violations involving the same hazards, the Area Office shall issue appropriate citations.

**NEW! OSHA FALL PROTECTION  
AWARENESS COURSE**

Get all the facts and learn how to maintain compliance with OSHA's new fall protection directive. In this 4-Hour course the following topics are addressed:

- OSHA Fall Protection Standards
- When Fall Protection is Required
- Safe Work Practices
- Overview of Fall Arrest Systems
- Rescue Plans
- Requirements of the New OSHA Directive
