Free Breakfast Workshop: What Florida Employers Need to Know About the H1N1 "Swine Flu" Epidemic.

Although media coverage of the H1N1 Swine Flu has subsided, the flu's ability to spread has not. As of this posting, there are now 122 confirmed cases of H1N1 "Swine Flu" in Florida. The need for employers to formulate a clear plan of response against a potential outbreak is becoming more important by the day. So to provide Tampa Bay Area businesses with the information and planning needed to ensure the safety of their workforce, Suncoast Safety Council has partnered with representatives from the Florida Department of Health to offer a free breakfast workshop entitled "What Florida Employers Need to Know About the H1N1 "Swine Flu" Epidemic."

This 1.5 hour workshop will provide area business owners, human resource executives, safety directors and frontline managers with information and strategies on the following topics:

- H1N1 outbreak prevention in the workplace
- Ways business owners can educate employees about flu prevention
- Review of Local, State & Federal protocols during a pandemic flu outbreak
- Continuity planning for your business in the case of a pandemic flu outbreak

Guest Speaker: Hunter Zager, Regional Emergency Response Advisor for the Tampa Bay Region, Florida Department of Health.

Mrs. Zager has worked for the Pinellas County Health Department in the fields of environmental health, epidemiology, and public health preparedness. In her current position, she advises local health departments on both preparedness planning and response issues, and serves as the operational arm of the Department of Health's Office of Emergency Operations within the Tampa Bay Region. Mrs. Zager will be on hand after her presentation to address any questions or comments concerning the H1N1 flu epidemic.
