Onsite Training

Occupational Safety Training Topics

AFFORDABLE, CUSTOMIZED ONSITE TRAINING SOLUTIONS

While other safety companies offer expensive one-size fits all training, we take a different approach by offering a variety of affordable training solutions tailored to meet your organization's unique training needs. Each course topic may be customized to your specific industry and new topics can be developed to fit your particular safety requirements. Classes are scalable and can be taught to as little as 10 or as many as 200 employees at a time.

Our 2-hour Mini Courses cost just \$400 and our 4-hour Onsite Safety Training is just \$600 regardless of class size (Employers are encouraged to schedule large group sizes to off-set training fees). Choose one course at a time, or group them as you like. All onsite safety training includes one company certificate of completion. Individual employee certificates are available for an additional fee of \$3 dollars per person.
