

▶▶▶ Affordable, Customized Training Solutions

While other safety companies may offer a one-size fits all training solution to your workplace safety challenges, we take a different approach by offering a variety of training solutions tailored to meet your organization's unique training needs.

Each mini-courses topic may be customized to your specific industry and new topics can be developed to fit your organization's safety requirements. Classes can be taught to as little as 10 or as many as 200 employees at a time. Each class costs just \$350 regardless of class size (employers are encouraged to schedule large group sizes to off-set training fees). All mini-courses will include a company certificate of completion for training.

▶▶▶ Looking for help with your next safety meeting?
