

Sologic's proprietary Causelink™ software is a powerful partner for conducting strategic root cause analyses and investigations. With design based entirely on our customers' experiences and requests, Causelink is an intuitive, user-friendly tool to help your team more effectively apply the Sologic method to solve real-world problems. Included with Sologic Facilitator training, Sologic Causelink quickly guides users through a logical process—from initial data gathering through to final reports and resolution plans.

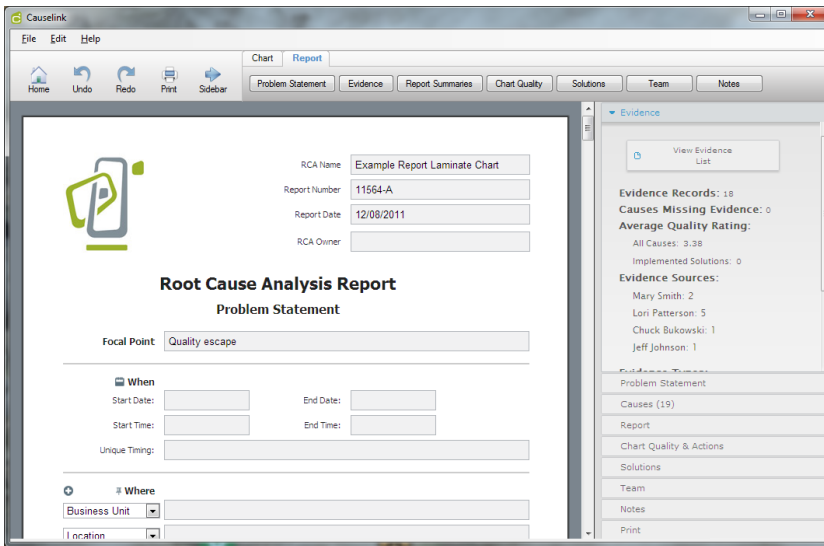

Users realize immediate results through deeper knowledge of the cause-and-effect relationships inherent in problems and incidents. They're also much more well-equipped to understand and document even the most complex problems.

Causelink empowers users to:

- » Create charts quickly and efficiently
- » Pinpoint evidence-based causes and effective solutions
- » Analyze and share data
- » Report to leadership in a language and format that captures their attention and active support
- » Pinpoint, understand and solve systemic problems
- » Achieve positive, lasting results, reach business goals, demonstrate ROI
